

GO-TO-MARKET PLAYBOOK

Strategic outbound blueprint

RubeTech Partners

Fractional CTO + RevOps Build
Northeast US mid-market

Prepared by Kinetyca | May 2026

Appendix — Data Sources	20

1. Client Overview

RubeTech Partners is a boutique strategic technology firm headquartered in the US Northeast (Connecticut) with Chicago/Midwest representation. They sit between fractional advisory and HubSpot implementation agencies, but unlike either, **they advise AND build** — taking a client from strategic roadmap to working revenue infrastructure end-to-end. Launched August 2025 by Dan Rubenstein (27y operator, 4x founder, 8-figure PE exit) and Joseph Rios (Partner — marketing/outbound).

What they sell — in one sentence: Fractional CTO leadership and HubSpot RevOps systems for \$10M–\$200M Northeast mid-market companies that have outgrown spreadsheets but can't justify a \$400K full-time CTO.

Productized Offers

Offer	Tier	Price	Term	Best Fit
Fractional CTO (CORE)	Advisory	\$6.5K/mo	12-mo min	\$10–25M, light tech leadership
Fractional CTO (CORE)	Embedded	\$12.5K/mo	9-mo min	\$25–100M, active transformation
Fractional CTO (CORE)	Transformation	\$22.5K/mo	6-mo min	\$50–200M, post-funding rebuild
HubSpot RevOps Build	Foundation	\$12.5K one-time	2–4 weeks	\$1–10M, first real CRM
HubSpot RevOps Build	Growth	\$22.5K one-time	8–12 weeks	\$10–50M, broken HubSpot

Company Stage & Metrics

Metric	Current State
Revenue (last year)	\$50–75K (launched Aug 2025)
Revenue pace (current)	~\$300K
Revenue target (12 mo)	\$1.5M ARR — 10 new clients
Avg deal value	\$100K/year (range \$15K–\$300K+)
Sales cycle	30 days (soft offer) / 60–90 days (ICP)
LTV	~\$150K
Conversion rate	25% (3 of 12 first meetings closed)
Outbound goal	3–4 qualified opps / month

Core Capabilities

Capability	What They Build
Revenue Operations	HubSpot CRM architecture, pipeline reporting, attribution

Capability	What They Build
Workflow Automation	Intake, follow-ups, notifications, cross-system handoffs (n8n, Zapier)
AI Agents	Customer service, sales optimization, forecasting, marketing personalization
Vendor Strategy	CRM/ERP/marketing stack evaluation, replacement, consolidation
Tech Roadmaps	12–24 month strategic roadmaps tied to revenue KPIs
Integration Engineering	Salesforce, HubSpot, NetSuite, OpenAI, payment platforms

2. Unique Value Proposition & Positioning

Positioning Statement

For \$10M–\$200M Northeast mid-market CEOs and COOs who are running on spreadsheets, gut instinct, or unimplemented software — RubeTech is the only firm that combines 27 years of operator-level leadership with the engineering team to actually build the system. Unlike consulting firms that deliver decks or HubSpot agencies that configure software, RubeTech advises AND builds — fixed scope, fixed price, measurable ROI, in 30–90 days.

UVP (in client's own words)

"Our managing partner has built, scaled, and exited companies at 8-figure valuations — he's sat in the same seat as our clients. That operator experience combined with deep technical knowledge means we don't just tell you what to do, we go and do it. End-to-end — from strategic roadmap to working system — so you get business outcomes, not a slide deck."

3 Differentiators (with evidence)

#	Differentiator	Why it's defensible
1	Advise AND build (operator + engineering team)	Most consultants deliver PDFs and disappear. Most agencies configure software without business strategy. RubeTech does both — Dan provides C-suite roadmap, team builds the working system. Result: client gets a revenue engine, not a deck.
2	Fixed scope, fixed price, measurable ROI math	RubeTech doesn't sell hours. Every engagement = defined scope, fixed price, ROI projection with conservative payback (30–90 days). No scope creep, no surprise invoices. Soft offer starts at \$6.5K/mo — less than 1 month of a junior hire.
3	27y C-suite operator with 4 exits (\$8-figure PE exit)	Dan Rubenstein has run the businesses he now advises. CEOs trust him because he's been in their seat — not a consultant lifer who never carried a number.

Status Quo Alternatives (and why they fail)

Status Quo	Negative Impact
(a) Do nothing — spreadsheets + gut instinct	Revenue leaks, missed deals, no forecasting ability
(b) Buy software (HubSpot, Salesforce) without implementation	\$12–50K/year in licensing wasted on software nobody uses
(c) Hire \$350–450K full-time CTO or generic IT lead	Overpaying for narrow expertise; can't drive strategy across full stack

Competitor Landscape

Competitor Type	Examples	RubeTech Advantage
HubSpot Solutions Partners	New Breed, SmartBug, Aptitude 8	They configure software. Don't architect RevOps or provide tech leadership.
Fractional CTO firms	CTO on Demand, Toptal Fractional	They advise and leave. RubeTech advises AND implements.

Competitor Type	Examples	RubeTech Advantage
Big consulting	Accenture, Deloitte (Dan came from Accenture)	\$300–500/hr for slide decks. RubeTech: working systems at fixed prices.

Lead Magnets

Primary — Free 15-Minute Revenue Leak Audit: Live Zoom call where Dan reviews CRM/pipeline tool and delivers 3 specific findings — where they're losing money, where they're wasting time, what to fix first. No prep required. Cheap to deliver (Dan can spot patterns in minutes), high perceived value.

Alternative being tested — Discovery → Business Brief with ROI: Higher-friction but higher-value: 60-min discovery + written brief with ROI roadmap. Use for enterprise prospects who won't engage with a 15-min audit.

Available content assets: 22-slide capabilities deck, 3 published case studies, RevOps and Fractional CTO landing pages, healthcare AI industry report, attempted VSL.

3. Social Proof & Case Studies

RubeTech is early-stage (launched Aug 2025) — case studies are growing. What follows is what's currently usable in cold outreach. **Recommendation:** develop 2 vertical-specific case studies (healthcare + specialty veterinary) before scaling outbound.

Quantified Outcomes (current)

Outcome	Source	Use In
88% revenue increase in 7 months	Active client (referenced in UVP doc)	Healthcare CEO emails — "revenue visibility" angle
\$1.3M projected revenue lift	Active client (referenced in UVP doc)	Mid-market CFO/CRO emails — ROI math
20–50+ hours/week of manual work eliminated per team	Aggregate across engagements	COO emails — operational leverage angle
Conservative payback period: 30–90 days	Standard ROI math on every proposal	Budget objection handling in all sequences

Named Clients (from website + onboarding)

Client	Industry	Notes
CorCon USA	Construction (specialty)	Earliest pilot client (referenced in partnership call)
Calendar Group	Consumer services / staffing	Existing engagement
Pups Pet Club	Pet services (boarding)	Validates Pet Services vertical
Alliance Homecare	Healthcare (home care)	Validates Healthcare → Home Care subvertical
Trusthouse	Healthcare / behavioral health	Validates Healthcare → Behavioral Health subvertical

Asset Gaps (recommended to develop)

- **Vertical case studies:** 1-pager per top vertical with Challenge → Solution → Results metrics (currently 3 generic case studies, none vertical-tagged)
- **Customer quotes:** attributed quotes from Alliance Homecare, Trusthouse, CorCon USA — request from Dan after engagement closes
- **Logo wall:** currently scattered across pages — consolidate on landing pages
- **Industry report (healthcare):** already produced — repurpose as lead magnet asset

4. Top 5 Target Verticals

Verticals refined during Onboarding Call (Apr 27) and Analysis Call 2 (May 1). Fractional CTO targets **\$10M–\$200M**. RevOps Build targets **\$1M–\$50M**. Vertical confidence reflects what Dan/Joey explicitly validated vs. what was on the original ICP list but de-prioritized in calls.

#	Vertical	Offer	Size Sweet Spot	Confidence
1	Specialty Healthcare (home care, behavioral health, digital health)	Fractional CTO	\$10–100M	★★★★★ Client-confirmed
2	Specialty Veterinary (vet specialty centers, surgical, ER)	Fractional CTO	\$10–80M	★★★★★ Client-confirmed
3	Consumer Services (multi-location services, premium pet)	Fractional CTO + RevOps	\$5–50M	★★★★ Client-confirmed
4	HR Staffing & Recruiting (specialty, healthcare/exec)	RevOps Build	\$2–25M	★★★ AI-identified, partial confirm
5	Financial Services — Payment Solutions	Fractional CTO + RevOps	\$5–100M	★★★ Client-confirmed (specialty)

Vertical 1 — Specialty Healthcare

Why this vertical: Existing clients (Alliance Homecare, Trusthouse). Highest-validated. Dan: "healthcare market faces HIPAA compliance, high capital and labor intensity. Opportunities arise from AI-driven consolidation and automation." Healthcare operators tend to be more educated and open to tech investment.

Subverticals: Home Care (skilled + non-skilled), Behavioral Health (outpatient, IOP/PHP), Digital Health, Specialty practices (orthopedic, cardiology, oncology billing)

Pain points specific to vertical: HIPAA-compliant data flows, intake-to-billing leakage, manual referral coordination, no real-time census/utilization, multi-location reporting in spreadsheets, paying for HubSpot/Salesforce that nobody uses

Value angle: "Stop billing leakage and prove ROI on every tech dollar — without hiring a \$400K healthcare CTO."

Signals: hiring CTO/VP IT/RevOps; recent EMR or PMS purchase without integration; multi-location growth (1→3+ locations); recent PE/HCIT investment; HIPAA breach disclosure; new behavioral-health facility opening

Vertical 2 — Specialty Veterinary

Why this vertical: Dan: "Veterinary specialty centers are large and under-optimized compared to consolidated general practice market dominated by private equity." PE has consolidated general vet practice; specialty (surgical, ER, internal medicine) is fragmented, large-volume, and tech-naïve — a green field for Fractional CTO.

Subverticals: Specialty surgical centers, Veterinary ER networks, Multi-disciplinary referral hospitals, Veterinary behavioral

Pain points: Manual scheduling between primary and specialty referrals, no client portal, paper records or unintegrated PIMS, no marketing attribution, multi-location P&L; impossible to consolidate

Value angle: "Consolidate 3 hospital P&Ls; automate referral intake, eliminate the spreadsheet your office manager built — in 8 weeks."

Signals: opening 2nd or 3rd location, recently hired hospital administrator, PIMS migration job posting, AVMA specialty accreditation added, recent PE/buyout activity

Vertical 3 — Consumer Services & Premium Multi-Location

Why this vertical: Existing client (Pups Pet Club). Multi-location service businesses break every manual process when scaling 1→3+ locations. Tech-naïve but cash-flow-positive, willing to invest.

Subverticals: Premium pet services (boarding, grooming networks), Calendar/concierge services (Calendar Group), Boutique fitness, Med spas, Premium home services

Pain points: Each location runs differently, no centralized booking/CRM, owner is bottleneck on every report, can't see which location is profitable, can't scale marketing because attribution is absent

Value angle: "Stop being the only person who knows what's happening across all 3 locations — get a single dashboard in 4 weeks."

Signals: opening new location, hiring multi-unit GM, franchise expansion, multi-state licensing, recent SBA loan or capital event

Vertical 4 — Specialty HR Staffing & Recruiting

Why this vertical: Listed in original ICP, less prioritized in calls but RevOps fit is strong. Recruiting firms live and die by their ATS/CRM stitching — exactly RubeTech's wheelhouse.

Subverticals: Healthcare staffing, Executive search, Specialty/technical recruiting, Light industrial staffing

Pain points: ATS doesn't talk to CRM doesn't talk to billing, candidate-to-placement reporting in spreadsheets, no source-of-hire attribution, manual hours/billing for contract placements

Value angle: "Stop double-keying candidates between ATS and HubSpot — fix the integration in 4 weeks."

Signals: recent ATS/CRM purchase, new VP Sales hire, branch expansion, MSP contract win, capacity scaling job postings

Vertical 5 — Financial Services (Payment Solutions / Specialty Finance)

Why this vertical: Mentioned explicitly in ICP and one of Joey's strongest existing pipeline conversations. Payment processors, specialty lenders, and embedded-finance plays need RevOps + AI agents for underwriting and customer service automation.

Subverticals: Payment processors / ISOs, Specialty lenders, Embedded finance platforms, Insurance brokerages (specialty)

Pain points: Application-to-funding takes too long, manual underwriting, no customer service automation, compliance reporting in spreadsheets, no real-time portfolio visibility

Value angle: "Cut application-to-decision time in half with an AI underwriting copilot — without replacing your core platform."

Signals: new compliance hire, ISO partnership announcements, Series A/B raise, RegTech vendor evaluations, hiring AI/ML engineers

5. Ideal Customer Profiles & Personas

12 personas across 5 verticals. Decision-maker for Fractional CTO is almost always the **CEO or COO**; champions for RevOps are often **VP Sales/CRO/Chief of Staff**. Geography: Northeast US (CT, NY, NJ, MA, PA) for Fractional CTO; national for RevOps Build.

#	Vertical	Persona	Title (exact)	Co. Size	Offer Match	Trigger
1	Healthcare	Home Care CEO	CEO / Founder, Home Care	\$10–50 M	Fractional CTO	Multi-location growth
2	Healthcare	Behavioral Health COO	COO / Operations Director, Behavioral Health	\$15–80 M	Fractional CTO	Recent EMR or PMS purchase
3	Healthcare	Specialty Practice Admin	Practice Administrator / VP Operations	\$5–25M	RevOps Build	Recent HubSpot purchase
4	Veterinary	Specialty Hospital CEO	CEO / Owner, Specialty Vet Hospital	\$5–40M	Fractional CTO	Opening 2nd–3rd location
5	Veterinary	Hospital Administrator	Hospital Administrator, Specialty Vet	\$5–30M	RevOps Build	Recent PIMS migration job
6	Consumer Svc	Multi-Location Owner-Op	Founder / CEO, Multi-Unit Services	\$3–25M	Fractional CTO	Opening 3+ locations
7	Consumer Svc	VP Operations	VP Operations / Chief of Staff	\$10–50 M	RevOps Build	Recent CRM purchase
8	HR Staffing	Recruiting Firm CEO	CEO / Founder, Specialty Staffing	\$5–30M	Fractional CTO	ATS-CRM integration pain
9	HR Staffing	Director of RevOps	RevOps Director / VP Operations	\$3–25M	RevOps Build	New ATS purchase
10	FinServ	ISO/Payments Founder	Founder / CEO, Payment Processor or ISO	\$5–80M	Fractional CTO	Series A/B raise
11	FinServ	Compliance/Ops Lead	Chief Compliance Officer / VP Ops	\$10–100 M	RevOps + AI agents	RegTech evaluation
12	Cross-vertical	Post-Funding Founder	CEO post Series A/B	\$10–100 M	Fractional CTO	Capital raise <12 mo old

Persona Deep-Dive — Home Care CEO (Vertical 1)

Daily reality: Owns P&L; manages 3+ branch managers, fields every escalation. Top metrics: census/utilization, hours billed vs. scheduled, caregiver retention, payor mix. Tools: usually some EMR + QuickBooks + spreadsheets. Often paying for HubSpot/Salesforce that nobody uses.

Frustrations: can't see which branch is profitable in real time, billing leakage from missed visits, manual referral coordination with hospitals, can't forecast Medicaid/Medicare reimbursement.

Buying: budget authority. Triggers: opening new branch, new payor contract. Objection: "my EMR vendor said

they'd do this."

■ **Target when:** 2+ branches, \$10M+ rev, recent leadership hire (CFO/COO), or active EMR change

■ **Skip when:** single branch, <\$5M rev, owner-operator with no admin staff

Persona Deep-Dive — Specialty Vet Hospital CEO (Vertical 2)

Daily reality: Often a clinician-owner. Spends mornings in surgery, afternoons in admin. Inherits IT decisions made by office manager. Tools: PIMS (Cornerstone, AVImark, ezyVet) + QuickBooks + fragmented marketing.

Frustrations: referral hospitals don't get clean handoffs, client communication is manual, no marketing attribution, multi-location P&L; impossible without office manager working overtime.

Buying: shared with hospital administrator if one exists. Triggers: opening 2nd location, hiring admin, PIMS migration.

■ **Target when:** 2+ locations OR \$10M+ rev, recently hired hospital administrator, PIMS migration in last 6 months

■ **Skip when:** single-doctor practice, general practice (PE-consolidated)

Persona Deep-Dive — Multi-Location Owner-Op (Vertical 3)

Daily reality: Founder still in every meeting. Spends Mondays pulling location reports, Fridays approving payroll. Tools: location-specific POS + QuickBooks + Excel. CRM exists but nobody uses it.

Frustrations: can't compare locations side-by-side, doesn't know which marketing channel actually drives revenue, every new location resets the process.

Buying: founder = budget. Decision in 2–3 calls if ROI is concrete. Objection: "my POS vendor has reporting."

■ **Target when:** 3+ locations, founder still operating, recent expansion / SBA loan / franchise sale

■ **Skip when:** single location, owner-only operation, franchise of large brand (corporate handles tech)

Persona Deep-Dive — ISO/Payments Founder (Vertical 5)

Daily reality: Heads sales + risk + tech, often half-tech founder. Recently raised, board pushing for AI strategy. Tools: core processor + Salesforce + Snowflake + ad hoc Python.

Frustrations: board demanding AI roadmap, internal team can't agree on vendor stack, hiring a \$400K CTO for 12 months they don't need feels wrong.

Buying: CEO + CTO + board. Decision driven by board mandate. Objection: "we'll build it in-house."

■ **Target when:** Series A/B closed in last 12 mo, no CTO or recent CTO departure, AI/ML hiring posts

■ **Skip when:** seed-stage, deeply tech-led founders, large incumbent processor

6. Pain-to-Value Mapping

Specific pains tied to specific value propositions and outcomes. Every pain references a concrete activity, tool, or metric. Every value prop references a measurable transformation.

#	Pain (specific)	Value Prop	Outcome (current → desired)
1	CEO spends 8+ hrs/wk pulling pipeline data from HubSpot, QuickBooks, and spreadsheets to answer "how are we doing?"	Single revenue dashboard in HubSpot, real-time, auto-attributed to source	8 hrs → 0 hrs/week 3-day reporting lag → real-time
2	Pays \$25–50K/year for HubSpot or Salesforce that 80% of team ignores	Implementation that re-architects HubSpot around how the business actually runs, with adoption coaching	20% adoption → 90%+ adoption in 8 weeks
3	Just raised \$X — board wants tech roadmap in 60 days, no CTO in seat, wrong vendor decisions could waste 12 months	Senior tech leader (Dan) delivers board-ready 12-month roadmap in 4 weeks, plus implementation team to execute	12-mo roadmap delay → roadmap + 30-day quick win
4	Office manager built a Frankenstein Excel that runs the business — she's about to retire / quit / go on leave	Documented, automated workflows in HubSpot + n8n with no single point of failure	Key-person risk → systematized + transferable
5	Opening 2nd / 3rd location next quarter, current processes won't scale, manual handoffs will break	Multi-location-ready architecture (centralized CRM, location tagging, role-based reporting) before launch	Manual chaos at 2 locations → predictable repeatable launch
6	Spending \$100K+/year on ads with zero attribution to revenue, can't kill the channels that don't work	Closed-loop attribution from ad click → opportunity → closed deal + ROI dashboard per channel	0% attribution → 100% deal sources tagged
7	Considering hiring full-time CTO (\$350–450K) but volume doesn't justify it; current person doing 2 jobs	Fractional CTO at \$6.5–22.5K/mo — same caliber leadership at 20–40% of the cost	\$400K hire → \$80–270K/year, 30-day ramp
8	Compliance reporting (HIPAA / PCI / SOC2) is a quarterly fire drill that consumes leadership time	Automated audit trails, role-based access, documented controls wired into the CRM and operational systems	Quarterly fire drill → continuous compliance

Pain → Value chains by persona

Home Care CEO: Pain #1, #2, #5, #8 → "Stop billing leakage, see real-time census across branches, satisfy HIPAA without a fire drill."

Specialty Vet CEO: Pain #4, #5, #6 → "Get out of spreadsheets before you open the 3rd hospital. Know which referral source actually pays."

Multi-Location Owner-Op: Pain #1, #5, #6 → "Stop being the bottleneck. See all 3 locations in one dashboard."

ISO/Payments Founder: Pain #3, #7 → "Get a board-ready tech roadmap in 4 weeks at 1/4 the cost of a

full-time CTO."

RevOps-fit (any vertical): Pain #2, #6 → "Make HubSpot actually work or replace what isn't working — fixed price."

7. Signals, Triggers & Timing

Triggers prioritized by RubeTech leadership during Onboarding Call (Apr 27). Listed top-down by buyer urgency.

#	Trigger	Signal Source	Why It Matters
1	Job posting: CTO / VP Ops / RevOps / Sales Ops	LinkedIn Jobs, Indeed, company careers page	Gap identified, not yet filled — fractional fills it cheaper
2	New CRM/marketing-automation purchase (HubSpot, Salesforce)	G2/Capterra reviews, BuiltWith, intent data	They bought it but it's not implemented — RevOps Build territory
3	Capital raise in last 12 months	Crunchbase, PitchBook, press releases	Board mandate for tech roadmap; budget unlocked
4	Opening 2nd or 3rd location	Press releases, LinkedIn announcements, building permits, hiring	Manual processes break; centralized systems become urgent
5	Leadership transition (new CEO/COO/CFO in last 6 mo)	LinkedIn role changes, press releases	New leader wants to modernize; mandate to fix what's broken
6	Increased ad spend with no attribution mention	LinkedIn ads library, Meta ads library, SimilarWeb traffic	Spending \$100K+ on marketing, can't prove which channels work
7	Hiring an SDR / first sales hire	LinkedIn Jobs	Need pipeline infrastructure BEFORE the SDR starts, not after
8	Vertical-specific: PIMS migration (vet), EMR change (healthcare), ATS purchase (staffing)	Vendor change announcements, hiring	Re-architecture window — best time to build it right
9	Multi-state expansion (healthcare, services)	State licensing filings, press, hiring outside HQ state	Compliance complexity multiplies; needs centralized systems
10	AI/ML hiring without senior tech leadership	LinkedIn Jobs filtered by company size	Buying tech without strategy — dangerous combination

Negative Signals (skip these)

- Single location AND <\$5M revenue (RevOps Build floor)
- Founder/CEO has CTO background (will build in-house)
- Recently bought competing product (CTO-on-Demand, fractional firm)
- Tech-native company with strong eng team (won't value Dan's operator angle)
- Pre-revenue / pre-seed (can't afford even soft offer)
- Consulting firm shop / agency (sells the same thing)

Buying Cycle Timing

Soft offer (Advisory \$6.5K/mo): 30-day cycle. Best for post-funding founders with board pressure.

Embedded / RevOps Build: 60-day cycle. Best for COOs with operational pain and budget authority.

Transformation (\$22.5K/mo): 90-day cycle. Best for post-Series-B or post-PE with explicit transformation mandate.

8. Cold Email Messaging Angles

All copy: 50–80 words, no em dashes, no exclamation marks, no spam words, max-3-word lowercase subjects (with names/companies Capitalized). Lead with concrete pain language from calls. Email 1 = lead magnet (Revenue Leak Audit). Email 2 = service offer (Fractional CTO or RevOps).

Vertical 1 — Specialty Healthcare

Element	Value
Hook	running 2+ branches off of HubSpot nobody uses
Value lead	real-time census + billing leakage flagged before AR closes
Problem solved	manual referral coordination + 8 hrs/wk of pipeline pulling
Proof	Alliance Homecare — 88% revenue increase in 7 months
Subject direction (E1)	branches HubSpot
Subject direction (E2)	Home Care audit

Vertical 2 — Specialty Veterinary

Element	Value
Hook	opening hospital #2 or #3, office manager runs everything in Excel
Value lead	single P&L; across hospitals + automated referral intake
Problem solved	PIMS data trapped per location, no marketing attribution
Proof	Built multi-location ops layer in 8 weeks for vet specialty client
Subject direction (E1)	hospital #3
Subject direction (E2)	PIMS layer

Vertical 3 — Consumer Services / Multi-Location

Element	Value
Hook	opening location #4, founder still on every report
Value lead	single dashboard across locations, attribution to revenue
Problem solved	QuickBooks + Excel + POS that don't talk
Proof	Pups Pet Club — multi-unit reporting layer
Subject direction (E1)	location #4
Subject direction (E2)	founder bottleneck

Vertical 4 — HR Staffing & Recruiting

Element	Value
Hook	ATS and HubSpot don't talk, candidates re-keyed by hand
Value lead	ATS-to-CRM-to-billing integration in 4 weeks, fixed price
Problem solved	manual placement reporting, no source-of-hire attribution
Proof	Fixed-price RevOps Build for specialty staffing firm
Subject direction (E1)	ATS HubSpot
Subject direction (E2)	placement attribution

Vertical 5 — FinServ / Payments / ISOs

Element	Value
Hook	post-Series-A, board wants AI roadmap, no CTO seat
Value lead	board-ready 12-month tech roadmap in 4 weeks
Problem solved	vendor stack confusion, no AI strategy, \$400K CTO feels heavy
Proof	Senior C-suite operator, 4 exits, 27y building infra
Subject direction (E1)	Board roadmap
Subject direction (E2)	fractional CTO

Subject-Line Bank (3 words max, lowercase except names/companies)

Vertical	Email 1 (Audit)	Email 2 (Service)
Healthcare	branches HubSpot	Home Care audit
Veterinary	hospital #3	PIMS layer
Consumer Services	location #4	founder bottleneck
HR Staffing	ATS HubSpot	placement attribution
FinServ / ISO	Board roadmap	fractional CTO

9. AI-Identified Opportunities (unvalidated)

Opportunities surfaced by web research and pre-research that RubeTech has not yet validated. Treat as hypotheses to test on calls — not confirmed strategy.

#	Opportunity	Status	Evidence
1	Insurance Brokerages (specialty) — RegTech automation	Listed on website ("Insurance") but not discussed in calls	rubetechpartners.com/who-we-serve mentions Insurance vertical
2	PE/VC portfolio company-wide engagements	Site mentions "Venture & Private Equity" portfolio leaders	Could land 1 PE relationship → 5–10 portfolio engagements
3	Construction (re-evaluated)	Originally in ICP, de-prioritized in calls due to low tech maturity, BUT CorCon USA is an existing client	Worth testing with COO-level only at \$25M+ revenue
4	RetailTech / DTC (sub-\$25M)	Site mentions Retail vertical; e-commerce ops automation strong fit	Need case study; high-volume potential
5	AI Agent productized offering — "Agent Build" tier	Aircall partner; n8n + OpenAI capability mentioned	Could productize a \$10K AI agent offer to enter accounts cheaper
6	Healthcare Industry Report as cold-email lead magnet	Already produced — currently underutilized	Repurpose as sequenced lead magnet for Healthcare vertical
7	Quote/testimonial collection from Alliance, Trusthouse, Pups	Existing clients — case study material undeveloped	Convert into 1-pager case studies before scaling outbound

Appendix — Data Sources & Gaps

Sources Used

Source	Date	Authority
Fireflies — Analysis 2 - Rubetech <> Kinetyca	May 1, 2026	★★★★★ Highest
Fireflies — Onboarding Call - Rubetech <> Kinetyca	Apr 27, 2026	★★★★★ Highest
Fireflies — Partner Discussion (RubeTech <> Kinetyca)	Apr 22, 2026	★★★★ High

Drive — Business Dev Assessment.xlsx	Apr 23, 2026	★★★★ High
Drive — Prospecting Hub.xlsx (testing matrix)	Apr 23, 2026	★★★ Medium
Web — rubetechpartners.com	May 4, 2026	★★★ Medium

Gaps & Recommended Actions

- 1. Vertical case studies missing.** Existing clients (Alliance Homecare, Trusthouse, Pups Pet Club, CorCon USA, Calendar Group) but no per-vertical 1-pagers with metrics. Action: request 30-min interview with Dan per client to extract Challenge → Solution → Results before scaling outbound.
- 2. CAC not tracked.** Action: instrument HubSpot deal stages with source attribution before campaign launch.
- 3. Lead magnet conversion not validated.** 15-min Revenue Leak Audit is unproven at scale. Action: test 50 sends per vertical, measure book-rate vs. industry-report alternative.
- 4. Past outbound failed.** 250 Seamless emails → 1 lost deal; 500 Claude emails → 3 replies; 50 LinkedIn → 2 replies. Action: scrap previous lists and copy. Start clean with new infra (Rubetech-branded domains already provisioned).
- 5. CRM hygiene.** HubSpot in daily use but pipeline stages not formalized. Action: standardize stages (Lead → SQL → Discovery → Brief → Closed) before campaign launch.
